PROFESSIONAL SUMMARY

Motivated Electronics and Communication Engineering student with hands-on experience in technical projects, programming, and cloud learning. Strong analytical, communication, and teamwork skills with the ability to understand technical concepts and explain them clearly. Passionate about emerging technologies, continuous learning, and helping organizations solve business challenges through innovative technology solutions.

EDUCATION

Pragati Engineering College — B.Tech in Electronics and Communication Engineering **2023 – 2027**
CGPA: 9.18

Madhuri Junior College — Board of Intermediate Education **2021 – 2023**
Percentage:97

TECHNICAL SKILLS

Programming Languages: Python, C, Verilog HDL

Embedded Systems: Arduino, ESP32, Digital Electronics

Databases: SQL, MongoDB (CRUD operations, query optimization)

Tools & Technologies: Tableau, MATLAB, Excel

Cloud & AI: Google Cloud Fundamentals, AWS Cloud Fundamentals, Artificial Intelligence Fundamentals

Soft Skills: Communication, Presentation Skills, Analytical Thinking, Quick Learning

EXPERIENCE

Software Programmer Intern **May 2025 – Jul 2025**

- Developed Python applications applying core programming and data-structure concepts to build efficient problem-solving solutions.
- Contributed to software development, testing, and debugging cycles, strengthening analytical and coding proficiency.

1M1B Green Internship **Jul 2025 – Aug 2025**

- Built interactive Tableau dashboards to visualize data and support data-driven decision-making.
- Conducted data analysis to surface actionable insights for sustainable, real-world solution development.

AWS Cloud Internship

- Completed hands-on training in AWS Cloud fundamentals and core cloud computing concepts.
- Gained knowledge of cloud security, storage, networking, and compute services.

PROJECTS

Automatic Water Tap Controller

- Built a touchless tap system using Arduino and IR sensors to detect hand movement and automatically control water flow.
- Reduced water wastage and improved hygiene through automated, contact-free operation.

Multilevel Access Control System

- Designed and simulated a multilevel, password-based access control system with layered, role-based authentication and secure verification logic.

AI Interview Question Generator

- Designed an AI-based tool that generates role-specific interview questions from user input, improving interview preparation with a user-friendly interface.

CERTIFICATIONS

- Google Cloud Cybersecurity Track — Google Cloud
- MongoDB Overview: Core Concepts and Architecture — MongoDB
- AI Upskilling: Hands-On Development from Model to App — Qualcomm Academy
- Introduction to Internet of Things — NPTEL
- C Programming and Problem Solving

ACHIEVEMENTS

- Secured academic merit for consistently high performance across semester examinations in B.Tech (ECE), maintaining a CGPA of 9.18.
